## D. PURPOSE OF THE REPORT

LANDLORDS SAFETY CHECK

## E. EXTENT OF THE INSTALLATION AND LIMITATIONS OF THE INSPECTION AND TESTING

Extent of the electrical installation covered by this report

ALL FIXED INTERNAL WIRING

Agreed limitations, if any, of the inspection and testing

NONE

BOILER CIRCUIT UNABLE TO TEST (NOT ACCESSIBLE)

This inspection has been carried out in accordance with BS7671:2008 amended to (date JULY 2008). Cables concealed within trunking and conduits, or cables and conduits concealed under floors, in roof spaces and generally within the fabric of the building or underground have not been inspected.

## F. SUMMARY OF THE INSPECTION

General condition of the installation (continue with additional pages, which must be marked with Domestic Periodic Inspection Report serial number and page numbers)

Good.

## G. DECLARATION

I, being the person responsible (as indicated by my signature below) for this report, particulars of which are set out above, having exercised reasonable skill and care when carrying out the inspection and testing, hereby declare that the information in this report, including the observations, provides an accurate assessment of the condition of the electrical installation, taking into account the stated extent of the installation and the limitation of the inspection and testing.

I further declare that the installation was in overall

SATISFACTORY

Satisfactory/Unsatisfactory

condition at the time of the inspection and that it should be further inspected as recommended

## For the INSPECTION, TESTING AND ASSESSMENT

## H. OBSERVATIONS AND RECOMMENDATIONS OF ACTION TO BE TAKEN

Referring to the attached schedules of inspection and test results and subject to the limitation stated (see E)

There are no items adversely affecting electrical safety

The following observations and recommendations are made

## I. NEXT INSPECTION

I recommend that this installation is further inspected and tested after an interval of not more than

5 YEARS

provided that items in H which have been attributed a code 1 are remedied without delay. Items which have a code 2 or 3 should be actioned as soon as possible.
