				Ind Visual inspection with use of instruments, minimum dismantling of accessories where accessible as agreed with client. No insulation resistance testing. Ind person th): Visual inspection with use of instruments, minimum dismantling of accessories where accessible as agreed with client. No insulation resistance testing. Ind person th): Visual inspection with BS 7671: 2008 (IET Wiring Regulations), as amended to 2015. It and generally within the fabric of the building or underground, have not been inspected should be made within an accessible roof space housing other electrical equipment. Ind (as indicated by my/our signatures below), particulars of which are described on page d testing, hereby declare that the information in this report, including the observations the condition of the electrical installation taking into account the stated extent of the Signature: Date: 14/12/2015										
Registration Nur	Int: Chris Heritage Fatinated age of electrical installation: 10 yea Ses: A The Earls Croft Address: 39 Queensland Aveune Evidence of alterations Ves estimated age: Ses: A The Earls Croft Postcode: CV3 5ES Postcode: CV5 Barbander Age: Installation Postcode: CV3 5ES Postcode: CV5 Records of installation Cate of previous N/A Installation Postcode: CV3 5ES Postcode: CV5 Records of installation Cate of installation Cate of installation N/A Installation Postcode: To assess compliance with BS 7671 The Earls Address Postcode: CV5 Records of installation Visual inspection Visual inspection with use of instruments, minimum dis accessible as agreed with client. No each of the fail installation and testing detailed in this report and accompanying schedules has been carried out in accortales with BS 7671 Visual inspection with use of instruments, minimum dis accessible as agreed within trunking and conduits. under foors: nor of pascs. and generally within the fabric of the bolding or underground, have not be a specifically agreed between the client and inspector prior to the inspection and testing of the electrical installation (as indicated by my/our signatures below), particulars of which are descrite						been identified.							

This form is based on the model shown in Appendix 6 of BS 7671:2008 amended 2015.

8 OBS	SERVATIONS AND RECOMMENDATIONS	S FOR ACTIONS TO BE TAKEN		
Referri	ng to the attached Schedule(s) of Inspections a	nd Test Results, and subject to the I	mitations specified on page 1 of this	report under 'Extent of the
	ion and Limitations of Inspection and Testing': here are no items adversely affecting electrical safety	or 🖌 The following	g observations and recommendations are	e made
Item No		Observations		Classification Code
1	Main earth loose at clamp (rectified on site)			FI
2	Single insulation showing outside of main switch	on load side (rectified on site)		FI
3	Copper core exposed on live terminal at D.B mai	n switch		C3
One of the	e following codes, as appropriate, has been allocated	to each of the observations made above	to indicate to the person(s) responsible f	or the installation the degree of urgency
for remed	lial action: Iger Present sk of injury. Immediate remedial action required	C2 Potentially dangerous - Urgent remedial action required	C3 Improvement recommended	FI Further investigation required without delay
Immedia	te remedial action for items:	Improv		
Urgent re	emedial action for items: N/A	Further	investigation I for items: 1, 2	
	is based on the model shown in Appendix 6 of BS 767	· · ·	Ref: DEIC223303L17	Page: 2 of 7

RECOMMENDATIONS

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

General condition of the installation in terms of electrical safety:

The installation in wired in PVC/PVC twin and earth and is well maintained

O NEXT INSPECTION

I/We recommend that this installation is further inspected and tested after an interval of not more than:

5 Years or change of tenant/owner (Enter interval in terms of years, months or weeks, as appropriate)

provided that any items in section 8 which have been attributed a Classification code C1 (danger present) are remedied immediately and that any items which have been attributed a code C2 (potentially dangerous) or require further investigation are remedied or investigated respectively as a matter of urgency. Items which have been attributed a Classification code C3 should be improved as soon as practicable (see section 8).

1.4	Condition of tails - Distributor/Consumer	N/A	· ·
1.5	Condition of metering equipment	N/A	V
1.6	Condition of isolator (where present)	N/A	V
2.0	PRESENCE OF ADEQUATE ARRANGEMENTS FOR PARALLEL OR SWITCHED ALTERNATIVE SOURCES (551.6; 551.7)	N/A	N/A
3.0	EARTHING / BONDING ARRANGEMENTS (411.3; Chapter 54)	-	
3.1	Presence and condition of distributor's earthing arrangement (542.1.2.1; 542.1.2.2)	N/A	V
3.2	Presence and condition of earth electrode connection where applicable (542.1.2.3)	N/A	N/A
3.3	Provision of earthing/bonding labels at all appropriate locations (514.13.1)	N/A	v
3.4	Confirmation of earthing conductor size (542.3; 543.1.1)	N/A	V
3.5	Accessibility and condition of earthing conductor at MET (543.3.2)	N/A	V
3.6	Confirmation of main protective bonding conductor sizes (544.1)	N/A	 ✓
3.7	Condition and accessibility of main protective bonding conductor connections (543.3.2; 544.1.2)	N/A	· · ·
3.8	Accessibility and condition of other protective bonding connections (543.3.2)	N/A	· ·
4.0	CONSUMER UNIT(S) / DISTRIBUTION BOARD(S)		
4.1	Adequacy of working space/accessibility to consumer unit/distribution board (132.12; 513.1)	N/A	V
4.2	Security of fixing (134.1.1)	N/A	V
4.3	Condition of enclosure(s) in terms of IP rating etc (416.2)	N/A	V
4.4	Condition of enclosure(s) in terms of fire rating etc (421.1.201; 526.5)	N/A	V
4.5	Enclosure not damaged/deteriorated so as to impair safety (621.2(iii))	N/A	V
4.6	Presence of main linked switch (as required by 537.1.4)	N/A	 ✓
4.7	Operation of main switch (functional check) (612.13.2)	N/A	V
4.8	Manual operation of circuit-breakers and RCD's to prove disconnection (612.13.2)	N/A	 ✓
4.9	Correct identification of circuit details and protective devices (514.8.1; 514.9.1)	N/A	 ✓
4.10	Presence of RCD quarterly test notice at or near consumer unit/distribution board (514.12.2)	N/A	 ✓
4.11	Presence of non-standard (mixed) cable colour warning notice at or near consumer unit/distribution board (514.14)	N/A	 ✓
4.12	Presence of alternative supply warning at or near consumer unit/distribution board (514.15)	N/A	N/A
4.13	Presence of other required labelling (please specify) (Section 514)	N/A	 ✓
4.14	Examination of protective device(s) and base(s); correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (421.1.3)	N/A	~
4.15	Single-pole switching or protective devices in line conductor only (132.14.1; 530.3.2)	N/A	 ✓
4.16	Protection against mechanical damage where cables enter consumer unit/distribution board (522.8.1; 522.8.11)	N/A	 ✓
4.17	Protection against electromagnetic effects where cables enter consumer unit/distribution board/enclosures (521.5.1)	N/A	 ✓
4.18	RCD(s) provided for fault protection - includes RCBOs (411.4.9; 411.5.2; 531.2)	N/A	 ✓
OUT	COMES Acceptable TICK Unacceptable C1 or C2 Improvement C3 Further FI Not ve	rified N/V Limitation LIM Not applic	cable N/

4.19	RCD(s) provided for additional protection - includes RCBOs (411.3.3; 415.1)	N/A	· ·					
4.20	Confirmation of indication that SPD is functional (534.2.8)	N/A	V					
4.21	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure (526.1)	N/A	~					
4.22	Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6)	N/A	N/A					
4.23	Adequate arrangements where a generating set operates in parallel with the public supply (551.7)	N/A	N/A					
5.0	FINAL CIRCUITS							
5.1	Identification of conductors (514.3.1)	N/A	 ✓ 					
5.2	Cables correctly supported throughout their run (522.8.5)	N/A	LIM					
5.3	Condition of insulation of live parts (416.1)	N/A	 ✓ 					
5.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1) (to include the integrity of conduit and trunking systems in metallic and plastic)	N/A	LIM					
5.5	Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	N/A						
5.6	Coordination between conductors and overload protective devices (433.1; 533.2.1)	N/A	 ✓ 					
5.7	Adequacy of protective devices: type and rated current for fault protection (411.3)	N/A	 ✓ 					
5.8	Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	N/A	 ✓ 					
5.9	Wiring system(s) appropriate for the type and nature of the installation and external influences (Section 522)	N/A	· ·					
5.10	Concealed cables installed in prescribed zones (see Extent and Limitations) (522.6.202)	N/A	LIM					
5.11	Cables concealed under floors, above ceilings or in walls/partitions, adequately protected against damage (see Extent and Limitations) (522.6.204)	N/A	LIM					
5.12	Provision of additional protection by RCD not exceeding 30mA:		· · · · ·					
5.12.1	For all socket-outlets of rating 20A or less, unless an exception is permitted (411.3.3)	N/A	 ✓ 					
5.12.2	Pror supply to mobile equipment not exceeding 32A rating for use outdoors (411.3.3)	N/A	N/A					
5.12.3	For cables concealed in walls at a depth of less than 50mm (522.6.202; 522.6.203)	N/A	 ✓ 					
5.12.4	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)	N/A	 ✓ 					
5.13	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	N/A	 ✓ 					
5.14	Band II cables segregated/separated from Band I cables (528.1)	N/A	LIM					
5.15	Cables segregated/separated from communications cabling (528.2)	N/A	LIM					
5.16	Cables segregated/separated from non-electrical services (528.3)	N/A	LIM					
5.17	Termination of cables at enclosures - indicate extent of sampling in Extent and Limitations of the report (Section 526)							
5.17.1	Connections soundly made and under no undue strain (526.6)	N/A	LIM					
	No basic insulation of a conductor visible outside enclosure (526.8)	N/A						
	Connections of live conductors adequately enclosed (526.5)	N/A						
	Adequately connected at point of entry to enclosure (glands, bushes etc.) (522.8.5)	N/A	· ·					
5.18	Condition of accessories including socket-outlets, switches and joint boxes (621.2 (iii))	Excluding Joint Boxes						
5.19	Suitability of accessories for external influences (512.2)	N/A						
5.20	Adequacy of working space/accessibility to equipment (132.12; 513.1)	N/A

DOMESTIC ELECTRICAL INSTALLATION CONDITION REPORT GUIDANCE FOR RECIPIENTS

(to be appended to the Report)

This Report is an important and valuable document which should be retained for future reference.

The purpose of this Condition Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in satisfactory condition for continued service (see Section 7). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger.

The person ordering the Report should have received the "original" Report and the inspector should have retained a duplicate.

The "original" Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.

Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested quarterly. For safety reasons it is important that this instruction is followed.

Section 4 (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in section 4 - Extent and Limitations on page 1.

For items classified in the observations as C1 ("Danger present"), the safety of those using the installation is at risk, and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work immediately.

For items classified in the observations as C2 ("Potentially dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

Where it has been stated that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code of C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated without delay. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section 8 - Recommendations).

For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The recommended date by which the next inspection is due is stated on page 3 under section 10 'Next Inspection', and on a label at or near to the consumer unit / distribution board.
