ELECTRICAL INSTALLATION CONDITION REPORT Issued in accordance with British Standard BS 7671 - Requirements for Electrical Installations

Certificate Reference:	10	17			
1 DETAILS OF 1	THE CLIENT				
Client: Metro St	udent Accomodat	tion			
Address: Scarletts	, Scarlett Lane, K	iln Green, Reading	g, RG10 9XD		
2 PURPOSE OF	THE REPORT				
Purpose for which this					
Five year safety asses	ssment requested	by client for cont	tinued use and safety	to residents	
3 DETAILS OF 1	THE INSTALLA	TION			
Installation Address:	Guild Tavern, 2	20-22 Tithebarn S	treet, Preston, 1DJ		
					NI/A
Description of premises	: Domestic I	N/A Commercial	Industrial Evidence of alteration	N/A Other:	N/A
Estimated age of electri		5 years	or additions:	Yes if yes, estimated	age: 1 years
Date of previous inspec	tion: 14/09		ation Contificato No. or r	rovievo Doriodio	
Records of installation a	available: N/A	Inspection Report	ation Certificate No or p rt No:	Si evious Periodic	N/A
4 EXTENT OF T	HE I NSTALLA	TION AND LIN	II TATI ONS OF TH	IE INSPECTION ANI	D TESTING
Extent of the electrica				D1 D2 requite hours hear	our managed All
circuits have been tes	J .			R1,R2 results have been	summated. All
Agreed and operational	limitations of the i	nspection and testi	ng (include reasons and	d person agreed with)	
No lifting of floor boa		•	•		
conduits, under floors,	in roof spaces and	generally within the	e fabric of the building of	to 2015. Cables concealed or underground, have not l	
unless specifically agree		ent and inspector pr	ior to the inspection.		
5 DECLARATIO		or the increation an	d tacting of the electric	al installation (as indicatos	by my/our
signatures below), part	iculars of which are	e described on page	1 (see section 2), hav	al installation (as indicated ing exercised reasonable s	kill and care when
7) and the attached sch	nedules (see sectior	n 17), provides an a	accurate assessment of	eport, including the observ the condition of the electr	ical installation
taking into account the	stated extent of th	e installation and th	ne limitations on the ins	spection and testing (see s	ection 4).
For the INSPECTION, Name: JONATHAN					Date: 23/08/2016
				- Discuela	Date. 23/00/2010
		ION OF THE II	NSTALLATION Installation in terms of e	electrical safety	
Overall assessment o					
continued use*:				SATISFAC	IURY
* An unsatisfactory a conditions have been		ates that dangero	us (Code C1) and/or	potentially dangerous (Code C2)

	SERVATIONS AND RECOMMENDAT		
Referr	ing to the attached Schedule(s) of Inspect	ions and Test Results, and subject to the limitations s on and Limitations of Enspection and Testing':	pecified on
	here are no items adversely affecting electrical		
	he following observations and recommendations	or	
Item No		Observations	Classification Code
1	Inspection Schedule Item 5.6: Condition of enclosure(s) in terms of fire	e rating etc (421.1.6; 421.1.201; 526.5) is recommended for improvement.	C3
One of th responsib	e following codes, as appropriate, has been allo ble for the installation the degree of urgency for	ocated to each of the observations made above to indicate to remedial action:	the person(s)
C1 Dan Risk	ger Present of injury. Immediate edial action required		vestigation vithout delay
Immedia	ate remedial action required for items:	N/A	
Urgent r	emedial action required for items:	N/A	
Improve	ement recommended for items:	1	
Further	investigation required for items:	N/A

1 <u>3/IN</u>	ISPECTION SCHEDULE		
Item	Description	Comment	Outcome
1.0	CONDITION/ADEQUACY OF DISTRIBUTOR'S/SUPPLY INTAKE EQU	IPMENT	
1.1	Service cable	N/A	~
1.2	Service head	N/A	~
1.3	Distributor's earthing arrangements	N/A	~
1.4	Meter tails – Distributor/Consumer	N/A	~
1.5	Metering equipment	N/A	 ✓
1.6	Means of main isolation (where present)	N/A	v
2.0	PRESENCE OF ADEQUATE ARRANGEMENTS FOR PARALLEL OR SWI	TCHED ALTERNATIVE SOURCES	
2.1	Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6)	N/A	N/A
2.1	Adequate arrangements where a generating set operates in parallel with the public supply (551.7)	N/A	N/A
3.0	AUTOMATIC DISCONNECTION OF SUPPLY		
3.1	Main earthing/bonding arrangements (411.3; Chap 54)		
3.1.1	Presence of distributor's earthing arrangement (542.1.2.1; 542.1.2.2)	N/A	v
3.1.2	Presence of installation earth electrode arrangement (542.1.2.3)	N/A	 ✓
3.1.3	Adequacy of earthing conductor size (542.3; 543.1.1)	N/A	N/A
3.1.4	Adequacy of earthing conductor connections (542.3.2)	N/A	~
3.1.5	Accessibility of earthing conductor connections (543.3.2)	N/A	~
3.1.6	Adequacy of main protective bonding conductor sizes (544.1)	N/A	~
3.1.7	Adequancy and location of main protective bonding conductor connections (543.3.2; 544.1.2)	N/A	~
3.1.8	Accessibility of all protective bonding connections (543.3.2)	N/A	~
3.1.9	Provision of earthing/bonding labels at all appropriate locations (514.13)	N/A	~
3.2	FELV - requirements satisfied (411.7; 411.7.1)	N/A	N/A
4.0	OTHER METHODS OF PROTECTION (where the methods of protecti should be provided on separate sheets)	on listed below are employed, de	tails
4.1	Non-conducting location (418.1)	N/A	N/A
4.2	Earth-free local equipotential bonding (418.2)	N/A	N/A
4.3	Electrical separation (Section 413; 418.3)	N/A	N/A
4.4	Double insulation (Section 412)	N/A	~
4.5	Reinforced insulation (Section 412)	N/A	~
5.0	DI STRI BUTI ON EQUI PMENT		
5.1	Adequacy of working space/accessibility to equipment (132.12; 513.1)	N/A	~
5.2	Security of fixing (134.1.1)	N/A	~
5.3	Condition of insulation of live parts (416.1)	N/A	~
5.4	Adequacy/security of barriers (416.2)	N/A	~
5.5	Condition of enclosure(s) in terms of IP rating etc (416.2)	N/A	~
5.6	Condition of enclosure(s) in terms of fire rating etc (421.1.6; 421.1.201; 526.5)	AMD 3	C3
5.7	Enclosure not damaged/deteriorated so as to impair safety (621.2(iii))	N/A	~
5.8	Presence and effectiveness of obstacles (417.2)	N/A	~
5.9	Presence of main switch(es), linked where required (537.1.2; 537.1.4)	N/A	~
OUTCON Accepta conditio	ble Unacceptable Improvement Further	Not verified N/V Limitation LIM app	Not blicable N/A

14/11	ISPECTION SCHEDULE	1	
Item	Description	Comment	Outcome
5.10	Operation of main switch(es) (functional check) (612.13.2)	N/A	~
5.11	Manual operation of circuit-breakers and RCDs to prove disconnection (612.132)	N/A	~
5.12	Confirmation that integral test button/switch causes RCD(s) to trip when operated (functional check) (612.13.1)	N/A	~
5.13	RCD(s) provided for fault protection – includes RCBOs (411.4.9; 411.5.2; 531.2)	N/A	~
5.14	RCD(s) provided for additional protection, where required - includes RCBOs (411.3.3; 415.1)	N/A	~
5.15	Presence of RCD quarterly test notice at or near equipment, where required (514.12.2)	N/A	~
5.16	Presence of diagrams, charts or schedules at or near equipment, where required (514.9.1)	N/A	~
5.17	Presence of non-standard (mixed) cable colour warning notice at or near equipment, where required (514.14)	N/A	~
5.18	Presence of alternative supply warning notice at or near equipment, where required (514.15)	N/A	N/A
5.19	Presence of next inspection recommendation label (514.12.1)	N/A	~
5.20	Presence of other required labelling (please specify) (Section 514)	N/A	N/A
5.21	Examination of protective device(s) and base(s); correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4, .5, .6; Sections 432, 433)	N/A	~
5.22	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.2)	N/A	~
5.23	Protection against mechanical damage where cables enter equipment (522.8.1; 522.8.11)	N/A	~
5.24	Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1)	N/A	~
6.0	DISTRIBUTION CIRCUITS / FINAL CIRCUITS	1	I
6.1	Identification of conductors (514.3.1)	N/A	~
6.2	Cables correctly supported throughout their run (522.8.5)	N/A	~
6.3	Condition of insulation of live parts (416.1)	N/A	~
6.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1)	N/A	N/A
6.5	Suitability of containment systems for continued use (including flexible conduit) (Section 522)	N/A	~
6.6	Cables correctly terminated in enclosures (Section 526)	N/A	~
6.7	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure (526.1)	N/A	~
6.8	Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6)	N/A	~
6.9	Adequacy of cables for current-carrying capacity with regard for the type and nature of installation (Section 523)	N/A	~
6.10	Adequacy of protective devices: type and rated current for fault protection (411.3)	N/A	~
6.11	Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	N/A	~
6.12	Coordination between conductors and overload protective devices (433.1; 533.2.1)	N/A	~
6.13	Cable installation methods/practices with regard to the type and nature of installation and external influences (Section 522)	N/A	~
6.14	Where exposed to direct sunlight, cable of a suitable type (522.11.1)	N/A	~
OUTCON Accepta conditio	ble Unacceptable Improvement Further	Not verified N/V Limitation LIM appli	ot cable N/A

	ISPECTION SCHEDULE		
Item	Description	Comment	Outcome
6.15	Cables concealed under floors, above ceilings, in walls/partitions less than containing metal parts:	50 mm from a surface, and in partit	ions
6.15.1	Installed in prescribed zones (see Section D. Extent and limitations) (522.6.202) or	N/A	~
6.15.2	Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical damage by nails, screws and the like (see Section D. Extent and limitations) (522.6.204;)	N/A	~
6.16	Provision of additional protection by 30 mA RCD		
6.16.1	For circuits used to supply mobile equipment not exceeding 32 A rating for use outdoors (411.3.3)	N/A	~
6.16.2	For all socket-outlets of rating 20 A or less unless exempt (411.3.3)	N/A	~
6.16.3	For cables concealed in walls at a depth of less than 50 mm (522.6.202, .203)	N/A	~
6.16.4	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)	N/A	~
6.17	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	N/A	~
6.18	Band II cables segregated/separated from Band I cables (528.1)	N/A	~
6.19	Cables segregated/separated from non-electrical services (528.3)	N/A	~
6.20	Termination of cables at enclosures - identify/record numbers and location	ns of items inspected (Section 526)	
6.20.1	Connections under no undue strain (526.6)	N/A	~
5.20.2	No basic insulation of a conductor visible outside enclosure (526.8)	N/A	~
5.20.3	Connections of live conductors adequately enclosed (526.5)	N/A	~
6.20.4	Adequately connected at point of entry to enclosure (glands, bushes etc.) (522.8.5)	N/A	~
6.21	Condition of accessories including socket-outlets, switches and joint boxes (621.2 (iii))	N/A	~
6.22	Suitability of circuit accessories for external influences (512.2)	N/A	~
6.23	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.2)	N/A	~
6.24	Adequacy of connections, including cpc's, within accessories and to fixed and stationary equipment – identify/record numbers and locations of items inspected (Section 526)	N/A	~
6.25	Presence, operation and correct location of appropriate devices for isolation and switching (537.2)	N/A	~
6.26	General condition of wiring systems (621.2(ii))	N/A	~
6.27	Temperature rating of cable insulation (522.1.1; Table 52.1)	N/A	~
7.0	I SOLATION AND SWITCHING		
7.1	Isolators (537.2)		-1
7.1.1	Presence and condition of appropriate devices (537.2.2)	N/A	/
7.1.2	Acceptable location – state if local or remote from equipment in question (537.2.1.5)	N/A	~
7.1.3	Capable of being secured in the OFF position (537.2.1.2)	N/A	v
7.1.4	Correct operation verified (612.13.2)	N/A	~
7.1.5	Clearly identified by position and/or durable marking (537.2.2.6)	N/A	~
7.1.6	Warning label posted in situations where live parts cannot be isolated by the operation of a single device (514.11.1; 537.2.1.3)	N/A	~
7.2	Switching off for mechanical maintenance (537.3)		
7.2.1	Presence and condition of appropriate devices (537.3.1.1)	N/A	~
7.2.2	Acceptable location – state if local or remote from equipment in question (537.3.2.4)	N/A	~
OUTCON Accepta conditio		Not verified N/V Limitation LIM app	Not licable N/

ELECTRICAL INSTALLATION CONDITION REPORT GUIDANCE FOR RECIPIENTS

(to be appended to the Report)

This Report is an important and valuable document which should be retained for future reference.

The purpose of this Condition Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in satisfactory condition for continued service (see Section 7). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger.

The person ordering the Report should have received the "original" Report and the inspector should have retained a duplicate.

The "original" Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.

Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested quarterly. For safety reasons it is important that this instruction is followed.

Section 4 (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in section 4 - Extent and Limitations on page 1.

For items classified in the observations as C1 ("Danger present"), the safety of those using the installation is at risk, and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work immediately.

For items classified in the observations as C2 ("Potentially dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

Where it has been stated that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code of C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated without delay. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section 8 - Recommendations).

For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The recommended date by which the next inspection is due is stated on page 3 under section 10 'Next Inspection', and on a label at or near to the consumer unit / distribution board.
