This certificate is not valid if the serial number has DCP6C/ been defaced or altered

04715934

Original (To the person ordering the work)

DOMESTIC ELECTRICAL INSTALLATION CER

Issued in accordance with British Standard 7671 - Requirements for Electrical Installations by a Registered Domestic Installer registered with

IRN/ 097HORN141218 Installer's Reference Number	accordance with <i>British Standard 7671 – Requirements for Electrical Installations</i> by a Registered Domestic Installer registered with NICEIC, Warwick House, Houghton Hall Park, Houghton Regis, Dunstable LU5 5ZX
DETAILS OF THE CLIENT	ADDRESS OF THE INSTALLATION
Client and address Sinon House Brighton East Sussex	Installation 97 Hornby Road address Bevendean East Sussex
Postcode BN2 4JE	Postcode BN2 4JH
DETAILS OF THE INSTALLATION	The installation is
Extent of the installation of a new consumer unit and full rewire to comply wit the current 18th edition work covered by this certificate	New An addition An alteration
DESIGN, CONSTRUCTION, INSPECTION AND TESTING	
I, being the person(s) responsible for the design, construction, inspection and testing of the electrical installation (as indicated by my signature adjacent), particulars of which are described above, having exercised reasonable skill and care when carrying out the design, construction, inspection and testing, hereby CERTIFY that the said work for which I have been responsible is, to the best of my knowledge and belief, in accordance with BS 7671, 17th Edition amended to 2015 (date) except for the departures, if any, detailed as follows:	The extent of liability of the signatory is limited to the work described above as the subject of this certificate. For the DESIGN , the CONSTRUCTION and the INSPECTION AND TESTING of the installation Signature Supplies (CAPITALS) STEPHEN HORSHAM Date 14/12/2018
Details of departures from BS 7671, as amended (Regulations 120.3, 133.5)	The results of the inspection and testing reviewed by the Qualified Supervisor
None	Signature SUDA (CAPITALS) STEPHEN HORSHAM Date 14/12/2018
PARTICULARS OF THE REGISTERED DOMESTIC INSTALLER	NEXT INSPECTION § Enter interval in terms of years, months or weeks, as appropriate
Trading title Stephen Horsham	I RECOMMEND that this installation is further inspected and tested after an interval of not more than 5 years
Address 10 Turnpike Close Peacehaven	COMMENTS ON EXISTING INSTALLATION Note: Enter 'NONE' or, where appropriate, the page number(s) of additional page(s) of comments on the existing installation None
	In the case of an alteration or additions see Section 633 of BS 7671
Telephone No 07766303003 Postcode BN10 8BU	SCHEDULE OF ADDITIONAL RECORDS* See attached schedule
NICEIC Registration No D 6 0 7 7 9 3	

Please see the 'Notes for Recipients' on the reverse of this page.

^{*} Where the electrical work to which this certificate relates includes the installation of a fire detection/alarm system (or a part of such a system), this electrical safety certificate should be accompanied by the particular certificate for the system.

NOTES FOR RECIPIENT

THIS SAFETY CERTIFICATE IS AN IMPORTANT AND VALUABLE DOCUMENT WHICH SHOULD BE RETAINED FOR FUTURE REFERENCE

IF YOU WERE THE PERSON ORDERING THE WORK, BUT NOT THE OWNER OR USER OF THE INSTALLATION, YOU SHOULD PASS THIS CERTIFICATE, OR A FULL COPY OF IT INCLUDING THESE NOTES, IMMEDIATELY TO THE OWNER OR USER OF THE INSTALLATION.

This safety certificate has been issued to confirm that the electrical installation work to which it relates has been designed, constructed, inspected, tested and verified in accordance with the national standard for the safety of electrical installations, British Standard 7671 (as amended) - *Requirements for Electrical Installations* (the IET Wiring Regulations).

Where, as will often be the case, the installation incorporates a residual current device (RCD), there should be a notice at or near the consumer unit stating that the device should be tested at quarterly intervals. For safety reasons, it is important that you carry out the test regularly.

Also for safety reasons, the complete electrical installation will need to be inspected and tested at appropriate intervals by a skilled person or persons competent in such work. NICEIC* recommends that you engage the services of a Registered Domestic Installer for this purpose. The maximum interval recommended before the next inspection is stated on Page 1 under *Next Inspection*. There should also be a notice at or near the consumer unit indicating when the inspection of the installation is next due.

Only an NICEIC Registered Domestic Installer responsible for the construction of the electrical installation is authorised to issue this NICEIC certificate.

The Domestic Electrical Installation Certificate consists of at least four pages. The certificate is invalid if pages (containing schedules) are missing. The certificate has a printed seven-digit serial number which is traceable to the Registered Domestic Installer to which it was supplied.

This certificate is intended to be issued for either the initial certification of a new electrical installation, or for new work associated with an alteration or addition to an existing electrical installation, in a single dwelling (house or individual flat). For new electrical installation work in other than a single dwelling, a full Electrical Installation Certificate should have been issued.

This certificate should not have been issued for reporting on the condition of an existing electrical installation. An Electrical Installation Condition Report or, where appropriate, a Domestic Electrical Installation Condition Report should be issued for such an inspection.

You should have received the certificate marked 'Original' and the Registered Domestic Installer should have retained the certificate marked 'Duplicate'.

The 'Original' certificate should be kept in a safe place and shown to any person inspecting or undertaking work on the electrical installation in the future. If you later vacate the property, this certificate will demonstrate to the new owner or user that the electrical installation work complied with the requirements of the national electrical safety standard at the time the certificate was issued.

Page 1 of this certificate provides details of the electrical installation, together with the names and signatures of the persons certifying the installation work and reviewing the results of inspection and testing on behalf of the Registered Domestic Installer responsible for the work, details of which are also given on that page.

Certification provides an assurance that the electrical installation work has been fully inspected and tested, and that the work has been carried out in accordance with the requirements of BS 7671 (except for any departures recorded in the appropriate part of the certificate).

All unshaded boxes should have been completed either by insertion of the relevant details or by entering 'N/A', meaning 'Not Applicable', where appropriate.

Where the electrical work to which this certificate relates includes the provision of a mains powered fire detection and alarm system (such as one or more smoke alarms), this electrical safety certificate must be accompanied by a separate certificate for that system in accordance with British Standard BS 5839-6: 2013: Fire detection and fire alarm systems for buildings - Part 6: Code of practice for the design, installation, commissioning and maintenance of fire detection and fire alarm systems in domestic premises.

Should the person ordering the work (e.g. the client, as identified on Page 1 of this certificate) have reason to believe that any element of the electrical work for which the Registered Domestic Installer has accepted responsibility (as indicated by the signatures on this certificate) does not comply with the requirements of the national electrical safety standard (BS 7671), the person should in the first instance raise the specific concerns in writing with the Registered Domestic Installer. If the concerns remain unresolved, the client may make a formal complaint to NICEIC, for which purpose a standard complaint form is available on request.

The complaints procedure offered by NICEIC is subject to certain terms and conditions, full details of which are available upon application and from the website. NICEIC does not investigate complaints relating to the operational performance of electrical installations (such as lighting levels), or to contractual or commercial issues (such as time or cost).

* NICEIC is operated by Certsure LLP, a partnership between the Electrical Contractors' Association and the charity, the Electrical Safety First. NICEIC maintains and publishes registers of electrical contractors that it has assessed against particular scheme requirements (including the technical standard of electrical work).

For further information about electrical safety and how NICEIC can help you, visit www.niceic.com
