

#### Electrical Certificate Installation/Modification

Requirements for Electrical Installations - BS 7671:2018 (IET Wiring Regulations 18th Edition)

### Information for recipients:

This safety Certificate has been issued to confirm that the electrical installation work to which it relates has been designed, constructed, inspected and tested in accordance with BS 7671 (the IET Wiring Regulations).

You should have received an original Certificate and the contractor should have retained a duplicate.

If you were the person ordering this work, but not the owner of the installation, you should pass this Certificate, or a copy of it, immediately to the owner.

The original Certificate is to be retained in a safe place and be shown to any person inspecting or undertaking work on the electrical installation in the future.

If you later vacate the property, this Certificate will demonstrate to the new owner that the electrical installation complied with the requirements of BS 7671 at the time the Certificate was issued. The Construction (Design and Management) Regulations require that, for a project covered by those regulations, a copy of this certificate, together with schedules, is included in the project health and safety document.

For safety reasons, the electrical installation will need to be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The maximum time interval recommended before the next inspection is stated on Page 2 under "NEXT INSPECTION".

This Certificate is intended to be issued only for a new electrical installation or for new work associated with an addition or alteration to an existing installation. It should not have been issued for the inspection and testing of an existing electrical installation. An "Electrical installation Condition Report" should be issued for such an inspection.

This Certificate is only valid if accompanied by the schedule of inspections and the schedule(s) of test results.

## Electrical Certificate Installation/Modification

# Electrical Certificate Installation/Modification Inspection Schedule

for Domestic and Similar Premises up to 100 A Supply

Requirements for Electrical Installations - BS 7671:2018 (IET Wiring Regulations 18<sup>th</sup> Edition) All items inspections to confirm as appropriate, compliance with the relevant clauses in BS 7671:2018

0 2 6 7 0 0 0 0 1 0 5 3 1 Page 4 of 5 **EIC** 

8.0 Circui	its										
8.1	Adequacy of conductors for current-carrying capaci	ty with r	egard	to type	and nature of the installation (Section 523)						
8.2	Cable installation methods suitable for the location(	s) and e	externa	al influe	nces (Section 522)						
8.3	Segregation/separation of Band I (ELV) and Band I	l (LV) ci	rcuits,	, and el	ectrical and non-electrical services (528)						
8.4	Cables correctly erected and supported throughout	with pro	otectio	on agair	st abrasion (Sections 521, 522)						
8.5	Provision of fire barriers, sealing arrangements whe	ere nece	ssary	(527.2							
8.6	Non-sheathed cables enclosed throughout in condu	ıit, ducti	ng or	trunkin	g (521.10.1; 526.8)	N/A					
8.7	Cables concealed under floors, above ceilings or in 522.6.202, 522.6.203; 522.6.204)	walls/p	artitio	ns, ade	quately protected against damage (522.6.201,						
8.8	Conductors correctly identified by colour, lettering of	r numbe	ering (	(Section	i 514)						
8.9	Presence, adequacy and correct termination of prof	Presence, adequacy and correct termination of protective conductors (411.3.1.1; 543.1)  Cables and conductors correctly connected, enclosed and with no undue mechanical strain (Section 526)									
8.10	Cables and conductors correctly connected, enclos	ed and	with n	o undu	e mechanical strain (Section 526)						
8.11	No basic insulation of a conductor visible outside er	nclosure	(526	.8)							
8.12	Single-pole devices for switching or protection in lin	e condu	ıctors	only (1	32.14.1; 530.3.3; 643.6)						
8.13	Accessories not damaged, securely fixed, correctly	connec	ted, s	uitable	for external influences (134.1.1; 512.2; Section 526)						
8.14	Provision of additional protection/requiren	nents k	y RC	CD not	exceeding 30 mA						
8.14.1	Socket-outlets rated at 32 A or less, unless exempt	(411.3.	3)								
8.14.2	Supplies for mobile equipment with a current rating	not exc	eedin	g 32 A	for use outdoors (411.3.3)						
8.14.3	Cables concealed in walls at a depth of less than 50 mm (522.6.202, 522.6.203)										
8.14.4	Cables concealed in walls/partitions containing metal parts regardless of depth (522.6.202; 522.6.203)										
8.14.5											
8.15	Final circuits supplying luminaires within domestic (household) premises (411.3.4)  Presence of appropriate devices for isolation and switching correctly located including:										
8.15.1	Means of switching off for mechanical maintenance (Section 464; 537.3.2)										
8.15.2	Emergency switching (465.1; 537.3.3)					NA					
8.15.3	Functional switching, for control of parts of the insta	llation a	and cu	ırrent-u	sing equipment (463.1; 537.3.1)						
8.15.4	Firefighter's switches (537.4)					N/A					
9.0 Curre	nt-Using Equipment (Permanently Connecte	ed)									
9.1	Equipment not damaged, securely fixed and suitable	e for ex	ternal	influen	ces (134.1.1; 416.2; 512.2)						
9.2	Provision of overload and/or undervoltage protectio	n e.g. fo	or rota	iting ma	chines, if required (Sections 445, 552)	(NA)					
9.3	Installed to minimize the build-up of heat and restric	t the sp	read o	of fire (4	121.1.4; 559.4.1)						
9.4	Adequacy of working space. Accessibility to equipm	nent (13	2.12;	513.1)							
10.0 Loca	tion(s) Containing A Bath Or Shower (Section		•								
10.1	30 mA RCD protection for all LV circuits, equipmen	t suitabl	e for t	the zone	es, supplementary bonding (where required) etc.						
11.0 Othe	r Part 7 Special Installations or Locations (I	ist all o	other	speci	al installations or locations present)						
	List all other special installations or location

12.0 Sch	edule of Test Results to be recorded on Sche	dule of	Test	Result							
12.1 Exte	ernal earth loop impedance, Ze	Yes		12.9	Insulation Resistance between Live Conductors	Yes					
12.2 Inst	allation earth electrode	(N/A)		12.10	Insulation Resistance between Live Conductors & Earth	Yes					
12.3 Pro	spective fault current, lpf	Yes		12.11	Polarity (prior to energisation)	Yes					
	·										
12.4 Cor	ntinuity of Earth Conductors	Yes		12.12	Polarity (after energisation) including phase sequence	Yes					

Inspector's Name:	Paula Ironmonger
Date:	09/10/2019

Continuity of Protective Bonding Conductors

12.9	insulation Resistance between Live Conductors	les
12.10	Insulation Resistance between Live Conductors & Earth	Yes
12.11	Polarity (prior to energisation)	Yes
12.12	Polarity (after energisation) including phase sequence	Yes
12.13	Earth Fault Loop Impedance	Yes
12.14	RCDs / RCBOs including selectivity	Yes
12.15	Functional testing of RCD devices	Yes
12.16	Functional testing of AFDD(s) devices	NA

Signature:	Peronnonge.
------------	-------------

12.6 Continuity of ring final circuit

12.8 Volt drop verified

## Electrical Certificate Installation/Modification Test Schedule

for Domestic and Similar Premises up to 100 A Supply

Requirements for Electrical Installations BS 7671:2018 (IET Wiring Regulations 18<sup>th</sup> Edition)
